

Integrate Calcination sheet into Plant sheet

Step by step example:

1. line007c: Kiln operation=yes!
2. line007n: Select method for determining CO₂ emissions from raw material calcination
3. When using method for the first time:
Create corresponding Calcination sheet by pressing a 'Create' button
4. Fill Calcination sheet
5. Manually copy values of **1 or 2 Output data** to Plant sheet Input
6. Change default values in Plant sheet to plant specific data, if available
